Students in Early Childhood Education (ECE) learn to meet the educational and developmental needs of young children. A career in ECE provides opportunities to touch the lives of hundreds of children. Upon completion of the Teacher Preparation Program, graduates are certified to teach prekindergarten through third grade in the state of Oklahoma. The facilities include a model teaching classroom and the Cleo L. Craig Child Development Laboratory which is an inclusive program for children ages 12 months through 6 years.

FIELD EXPERIENCES AND INTERNSHIPS

ECE students begin field experiences in the sophomore year. Students complete field experiences in the Cleo L. Craig Child Development Lab, pre-schools, and public or private schools. Students are expected to work in the field five semesters with varying number of hours and expectations. Thus, students will have acquired over 1200 hours of classroom experience by the time they graduate. These experiences in rural, suburban, and urban schools provide opportunities to work with children from infancy through third grade. This training emphasizes interaction between faculty and students as well as hands-on learning to link theory and research to daily practice.

This program is accredited through the National Association for the Education of Young Children (NAEYC) and the Council for the Accreditation of Educator Preparation (CAEP).

SPECIALIZED COURSES

Infant and Toddler Programming

Individuals with Developmental Delays and Disabilities
Throughout the Life Span

Development of Creative Expression, Play and Motor Skills
